

WHAT IS CLAIMED IS:

1. A disposable wearing article having a front waist region,
a rear waist region and a crotch region extending between said
5 waist regions, each having an inner surface facing a wearer's
body and an outer surface facing away from said wearer's body,
and said crotch region being formed in a transversely middle
zone thereof on said inner surface with a protrusion surrounding
at least one of an anus and a urethral of said wearer, said
10 disposable wearing article further comprising:

a holder member having said front waist region, said rear
waist regions and said crotch region; and

a bodily discharge receiving member detachably held by
said holder member;

15 wherein said crotch region is provided in a transversely
middle zone thereof with a through-hole extending between said
inner surface and said outer surface, and said receiving member
comprises an annular portion adapted to be detachably inserted
from a side of said outer surface of said holder member into
20 said through-hole so as to form said protrusion and a bursiform
portion lying at a side of said outer surface of said holder
member and joined to an outer periphery of said annular portion
so that bodily discharges flow through said annular portion into

said bursiform portion and said receiving member is held by said holder member by detachably joining said receiving member to said holder member around said through-hole.

5 2. The wearing article according to Claim 1, wherein lateral portions of said holder member in said front and rear waist regions are releasably engaged with each other to define a waist-hole and a pair of leg-holes.

10 3. The wearing article according to Claim 1, wherein lateral portions of said holder member in said front and rear waist regions are permanently joined together to define a waist-hole and a pair of said leg-holes.

15 4. The wearing article according to Claim 1, wherein said protrusion comprises flexible and elastically compressive foamed plastic.

5. The wearing article according to Claim 1, wherein said
20 bursiform portion is formed by a liquid-impervious sheet.

6. The wearing article according to Claim 1, wherein said holder member is washable and reusable.

7. The wearing article according to Claim 1, wherein said holder member is elastically stretchable.
